

Make Your Own TRI- HEXAFLEXAGON

- 1 Cut out around perimeter of template.
- 2 Fold in half lengthwise, then open up flat to apply glue or tape, then refold in half again, securing glue or tape.
- 3 Accordion fold in both directions, forward and backward.
- 4 Fold bottom 6 sections forward and up to the right.
- 5 Fold last 4 sections forward and to the left, then tuck under as arrow shows.
- 6 Fold last triangle section with black dot downward and back, and tuck in so both black dots are touching. Glue or tape sections with black dots together.
- 7 Flex your tri-hexaflexagon.
Push corners inward as shown, and fold a new side open.
- 8 Decorate all 3 sides with your own custom designs, then Hexaflex infinitely!
